JOB OBJECTIVE

Driving the development of scalable, secure, and high-performance back-end systems using Node.js, Express.js, MongoDB, and cloud-based microservices; targeting opportunities to leverage **nearly 3 years** of experience in API optimization, workflow automation, and delivery of efficient software solutions.

CORE COMPETENCIES

- Node.js Development
- Express.js & REST API Design
- MongoDB & Database Architecture
- MERN Stack Development
- Microservices Architecture
- Docker & Containerization
- AWS Cloud Deployment
- Kafka Messaging Systems
- Redis Caching & Performance Optimization
- Automated Testing
- Back-end Automation & Workflow Optimization
- API & Third-Party Integrations
- Server-Side Logic & Architecture Design
- Security & Data Integrity
- Agile Development & Collaboration
- Software Development Life Cycle

SOFT SKILLS

- Systematic Thinker
- Results Oriented
- Precision Oriented
- Problem-solver
- Scalability Awareness

EDUCATION

- MCA** (Pursuing) | Lovely Professional University (Part-time) | Pursuing (2023 – Present)
- BCA** | IGNOU (Part-time) | 2023

ACHIEVEMENTS

- Optimized Back-end Throughput:** Improved API handling with asynchronous processing and database query optimization for high-traffic operations.
- Reduced System Downtime:** Designed automated health checks and failover mechanisms to ensure high system availability.
- Enhanced Security & Compliance:** Implemented role-based access control and input validation, reducing vulnerabilities and ensuring data protection.
- Accelerated Feature Delivery:** Built modular back-end frameworks and reusable API templates, shortening development cycles while maintaining test coverage.

PROFILE SUMMARY

- Solutions-focused** with rich experience in designing **scalable back-end systems** using **Node.js, Express.js, MongoDB, Redis, Kafka, and REST APIs**; skilled in **MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js, and PHP**, building dashboards and reusable front-end components with seamless back-end integration and production-grade quality.
- Experienced in implementing **BTCPay Server integration, streamlining workflow, reducing errors**, and supporting **payment workflow and referral systems**.
- Proficient in deploying **Dockerized microservices on AWS (EC2, S3, CloudFront)** and optimizing **API performance for high-traffic production systems**.
- Skilled in **automating operations** and **implementing caching, messaging, and load balancing** to improve **uptime and system reliability**.
- Proven skills in **unit and integration testing with Jest and Supertest**; strong knowledge of **API design, database architecture, server-side logic, and third-party integrations**.

TECHNICAL SKILLS

- Core Programming & Frameworks:** JavaScript, TypeScript, Node.js, Express.js, React.js, Next.js
- Back-end Technologies:** REST APIs, Swagger, Kafka, Redis
- Databases & Data Management:** MongoDB, Prisma
- Front-end Technologies:** HTML, CSS (Bootstrap, Tailwind CSS), Redux, Redux Toolkit, shadcn/ui, Material UI, SEO Optimization
- Cloud & DevOps:** Docker, AWS (EC2, S3, CloudFront), Git, Linux
- Testing & Quality Assurance:** Jest, Supertest
- Development & Monitoring Tools:** Postman, Webpack, Sentry

WORK EXPERIENCE

Jan'24 – Present | Software Developer | Gamemano Pvt. Ltd.

Key Result Areas:

- Implementing real-time monitoring and alerting systems to proactively detect system anomalies.
- Collaborating with cross-functional teams to design scalable casino workflow, improving operational efficiency.
- Refactoring legacy codebases to reduce technical debt and improve maintainability.

Highlights:

- Developed a BTCPay server to process **3,000+ crypto transactions/month**, reducing manual payout errors by **90%**.
- Supported containerized microservices on AWS using Docker and EC2, accelerating deployment speed by **60%**.
- Ensured **85%+** unit and integration test coverage, delivering production-grade quality and minimizing regressions.
- Automated **80%** of manual casino operations, reducing downtime and enhancing system reliability.
- Optimized API performance with Redis caching, Kafka messaging, and load balancing, supporting **100K+ daily requests** with **<200ms** latency and improving response time by **40%**.

May'23 – Jan'24 | MERN Stack Developer | Webient Technologies

Key Result Areas:

- Designed responsive UI/UX components, improving accessibility and engagement.
- Integrated third-party APIs & payment gateways, streamlining workflow & expanding functionality.
- Optimized database queries and indexing, improving data retrieval speed and reducing server load.

Highlights:

- Developed Pink Aprons app with PHP back-end and React.js front-end, serving **5K+ active users**.
- Delivered scalable client features, resulting in **2x** repeat project requests.
- Led creation of a component library with **30+ reusable React.js components**, accelerating new feature development by **30%**.
- Deployed MERN stack applications with **25%** faster page loads, enhancing client satisfaction.

VOLUNTARY ASSIGNMENT

2021 – 2023 | Teaching Assistant | CodeHelp by Love Babbar

Guided **30,000+** students in **DSA**; engaged in live code reviews and real-time support.

INTERNSHIP

Oct'22 – Apr'23 | MERN Stack Developer Intern | Daylogic Infotech

- Architected reusable APIs for user management and authentication (reducing future development time by **40%**); refined QA workflow to reduce UI bugs by **50%**, and developed full stack modules with React.js and Node.js, achieving **95%** on-time feature delivery.

PROJECTS

Monkey Temple Casino | Role: Back-end Developer | Tech Stack: Node.js

- Architected and deployed core back-end services for payment integration, referral workflow, and casino automation, engineered Bitcoin-based transaction handling, and optimized REST APIs for low latency.
- Enhanced transaction processing and reduced API response times, improving platform performance and user experience.

Link Up Companion | Role: Back-end & Admin Panel Developer | Tech Stack: Node.js, React.js

- Designed and implemented back-end APIs and an admin dashboard for a ticketing app, streamlined event tracking, management, and user ticket workflow.
- Accelerated event creation and ticket assignment, reducing manual admin work and improving operational efficiency.
